User guide

A tour of the AV Job Finder pages. Each screenshot has numbered arrows; the list under it says what each one does. For installing and running the project, see the README.

Before you start

You can browse jobs, companies and trends without an account. **Saving** jobs and companies, and the account pages, need you to sign in. Create an account on the **Sign Up** page (section 1) and use it on the **Log in** page (section 2), or use the demo account. Once you are signed in, the **Login** and **Sign Up** buttons are replaced by a round profile button.

Where the data comes from

The jobs and trends on the site are collected automatically from public sources, not typed in by hand.

- **Sources.** Public job ads that autonomous-vehicle employers publish on their own career systems (such as Greenhouse, Lever, Ashby, SmartRecruiters and Workday) and on a few company career pages. Only the job ads are read, nothing about applicants.
- **Preparation.** A program collects the ads, cleans them, and keeps the roles that are really about autonomous vehicles, including related engineering roles that never use the word. It then gives each job a category (such as Perception or Planning) and a list of skills.
- **Not live.** The collection runs in batches, so the site shows the latest batch and not the employers' sites in real time. A job may have been filled or taken down since. Use **View original posting** on a job to check.

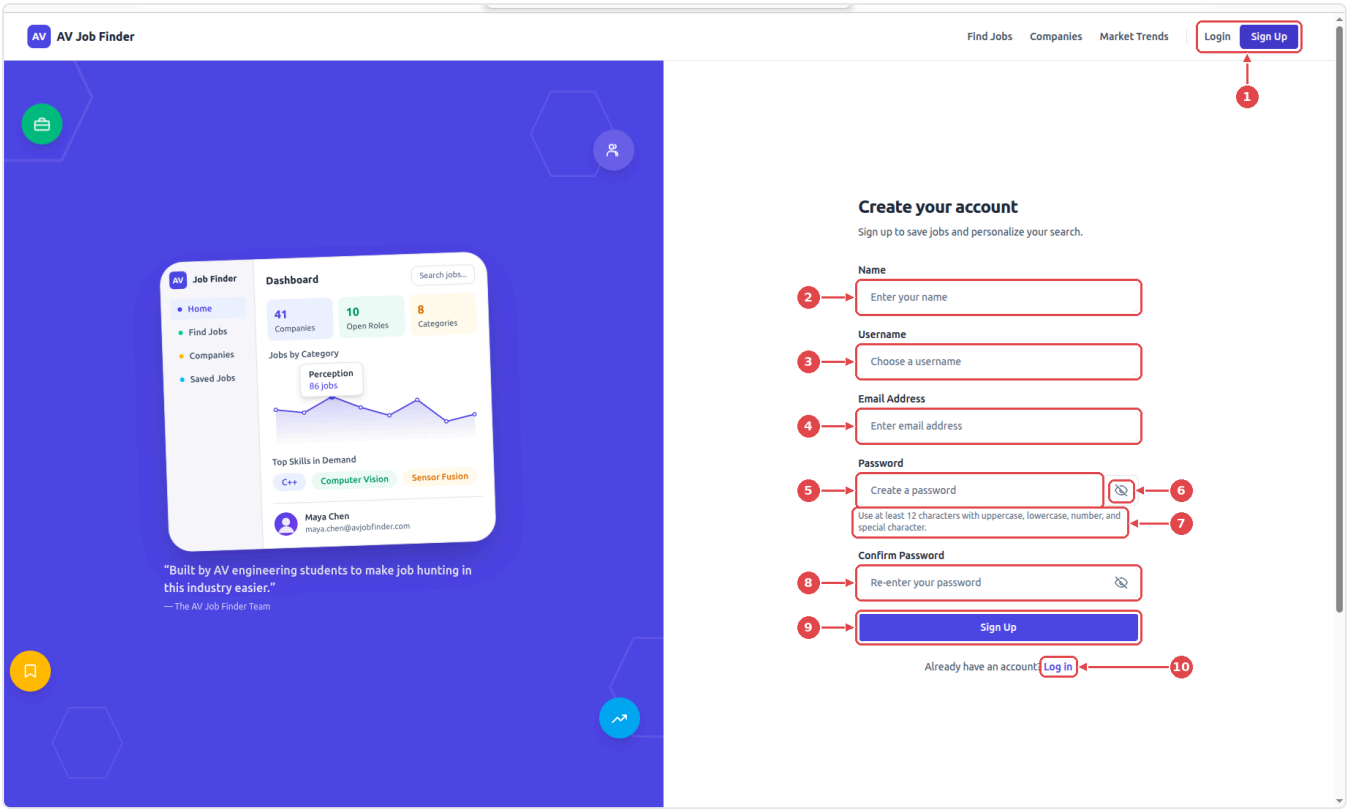

What you see on a job, and where it comes from:

- **Salary.** A figure without a mark is the pay the employer published. A figure with a **~** in front is a company-wide estimate, shown only when the ad gives no pay. If neither exists, the salary is left blank.
- **Posted date.** The date given by the employer, or "Date unknown" when the ad has none.
- **Seniority.** Worked out from the words in the job title, so **Mid-level or not stated** also contains jobs whose title says nothing about level.
- **Category and skills.** Assigned automatically, so a few may be off.
- **Location.** Shown as the ad writes it, so a job with several offices, or "Remote", can appear as one line of text.
- **Market Trends.** Uses the last collection of each month and counts the postings that list a skill, so each month is one snapshot.

How the collection is run is described in the scrapers setup guide.

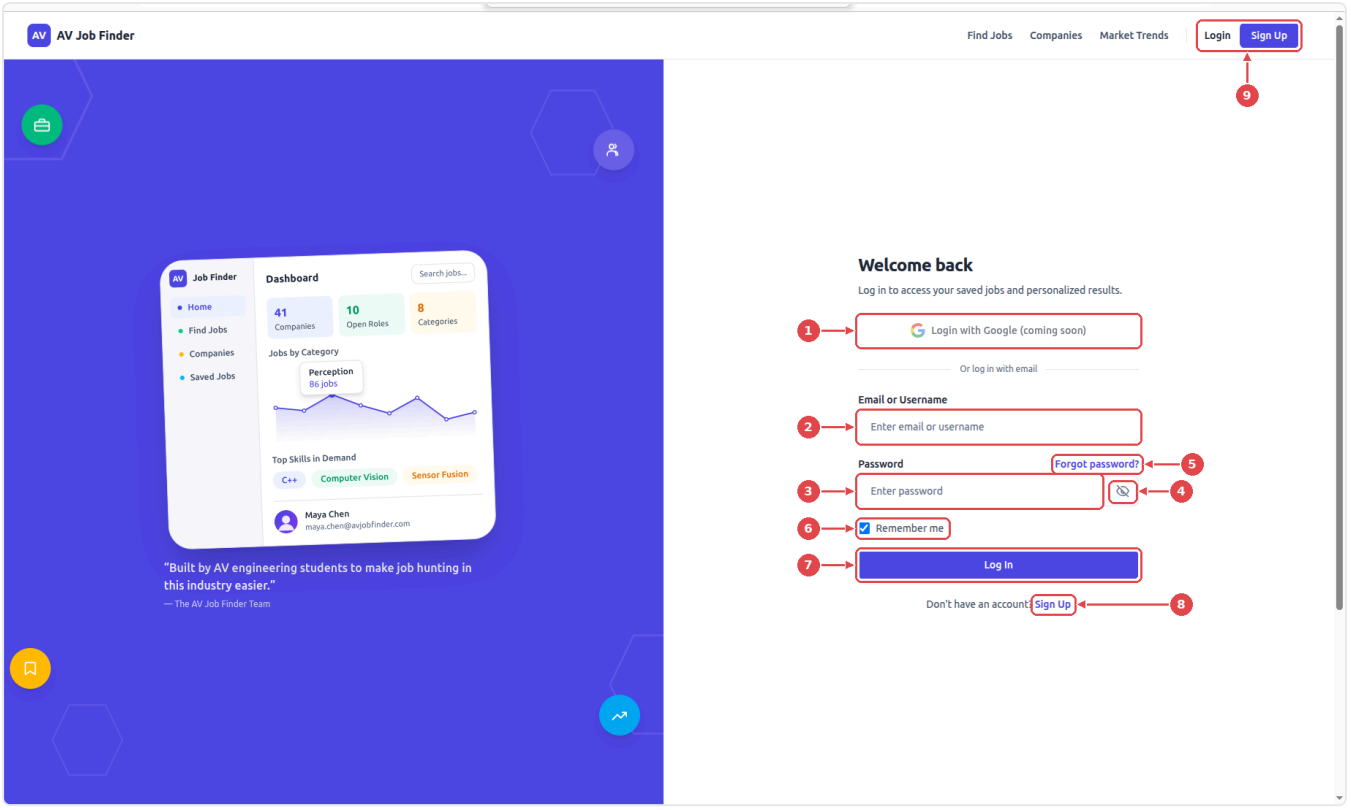

1. Sign up

Create your account once. Open the page with the **Sign Up** button at the top right of any page.

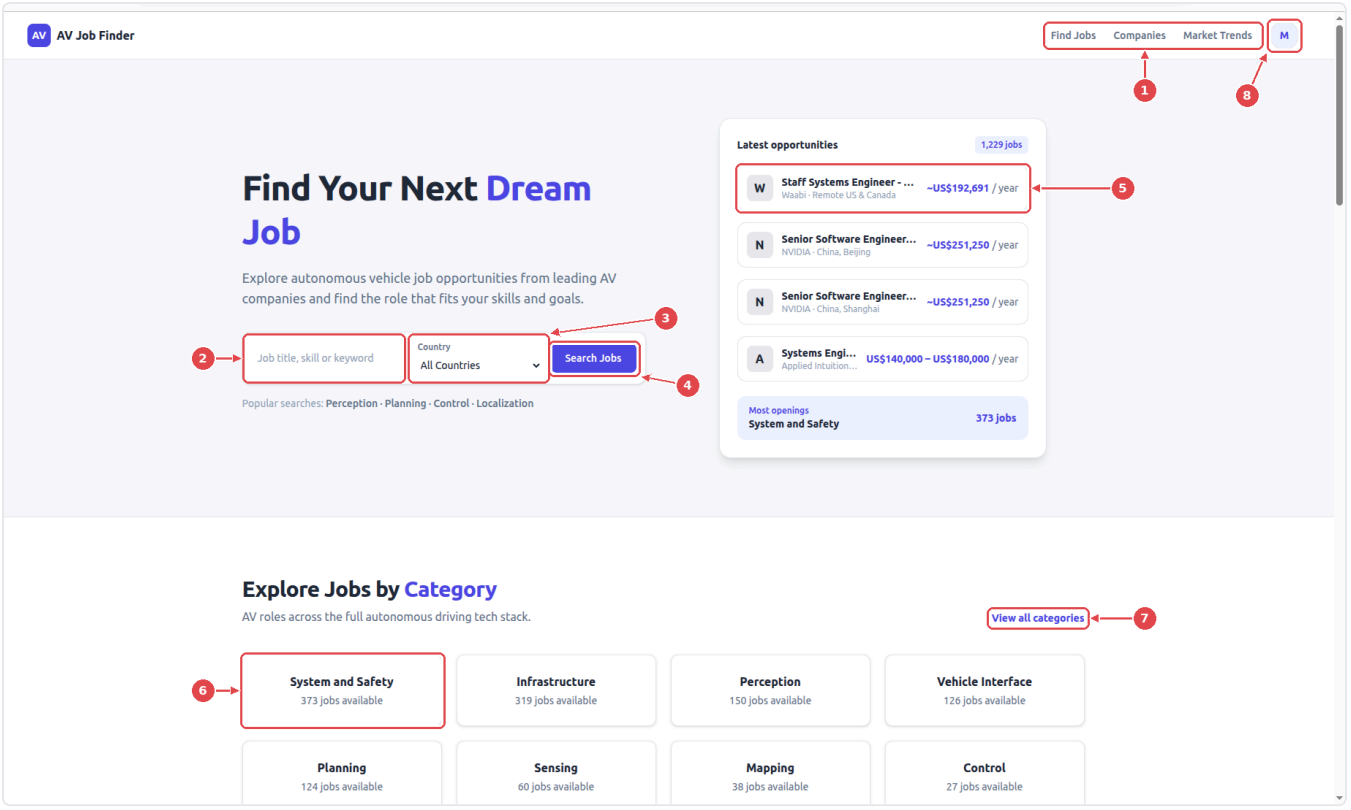

1. **Login and Sign Up buttons.** At the top right of every page while you are signed out. They open the log-in page and this page.
2. **Name.** Your full name.
3. **Username.** 3 to 50 characters: letters, numbers, underscores, periods or hyphens. You can sign in with it later instead of your email.
4. **Email address.** A valid address. It must not already belong to another account.
5. **Password.** At least 12 characters, with an uppercase letter, a lowercase letter, a number and a special character.
6. **Eye icon.** Shows or hides what you typed in the password box, so you can check it. Press it again to hide it.
7. **Password rules.** The reminder shown under the box.
8. **Confirm password.** Type the same password again.
9. **Sign Up.** Creates the account. You are signed in straight away and taken to the home page. If the email or username is already taken, a message tells you.
10. **Log in.** Already have an account? This goes to the log-in page.

2. Log in

1. **Login with Google.** Not available yet ("coming soon"). Use your email or username instead.
2. **Email or Username.** Either one works.
3. **Password.** The one you chose when you signed up.
4. **Eye icon.** Shows or hides the password as you type.
5. **Forgot password?** Opens a **Password recovery** page. Recovery is not available yet: the page is a placeholder with a link back to log in.
6. **Remember me.** Ticked by default. It keeps you signed in for longer (a week by default, instead of 30 minutes).
7. **Log In.** Signs you in. After several wrong attempts in a row you have to wait a few minutes before trying again.
8. **Sign Up.** No account yet? This goes to the sign-up page.
9. **Login and Sign Up buttons.** The same buttons as on every other page while you are signed out.

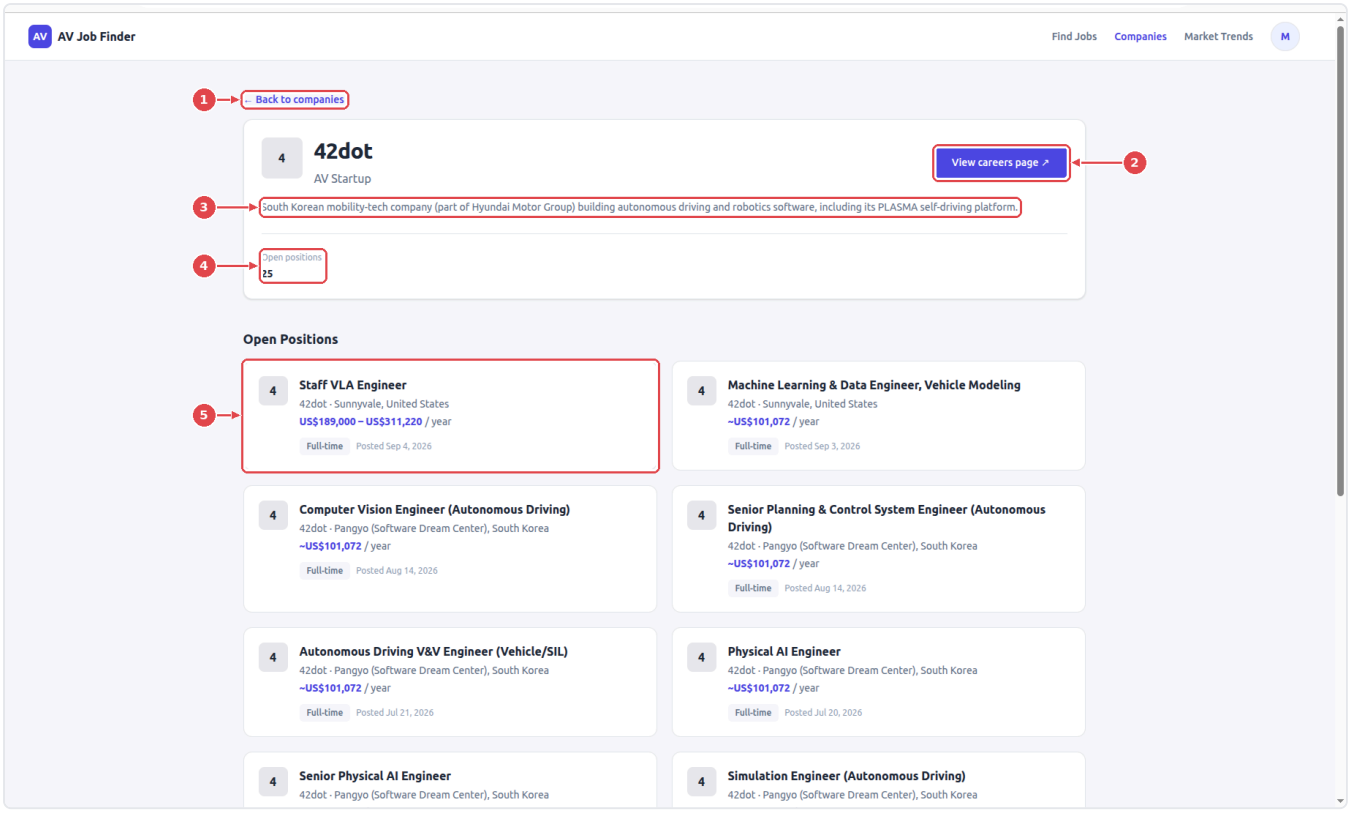

3. Home

1. **Navigation bar.** Go to **Find Jobs**, **Companies** or **Market Trends**. It is at the top of every page, and the page you are on is highlighted.
2. **Keyword box.** Type a job title, skill or keyword, for example "perception" or "ROS".
3. **Country.** Optional. Limit the search to one country. The list only contains countries that currently have jobs.
4. **Search Jobs.** Opens **Find Jobs** with your keyword and country already filled in.
5. **Latest opportunities.** The newest postings with their pay. Click one to open its details.
6. **Category cards.** Each card is a job category and the number of jobs in it. Click a card to see only those jobs in **Find Jobs**.
7. **View all categories.** Opens **Find Jobs** with no category chosen, so you can pick one there.
8. **Profile button** (signed in). Opens a menu with **Change Information** (your account page), **My Favorite List** and the option to log out.

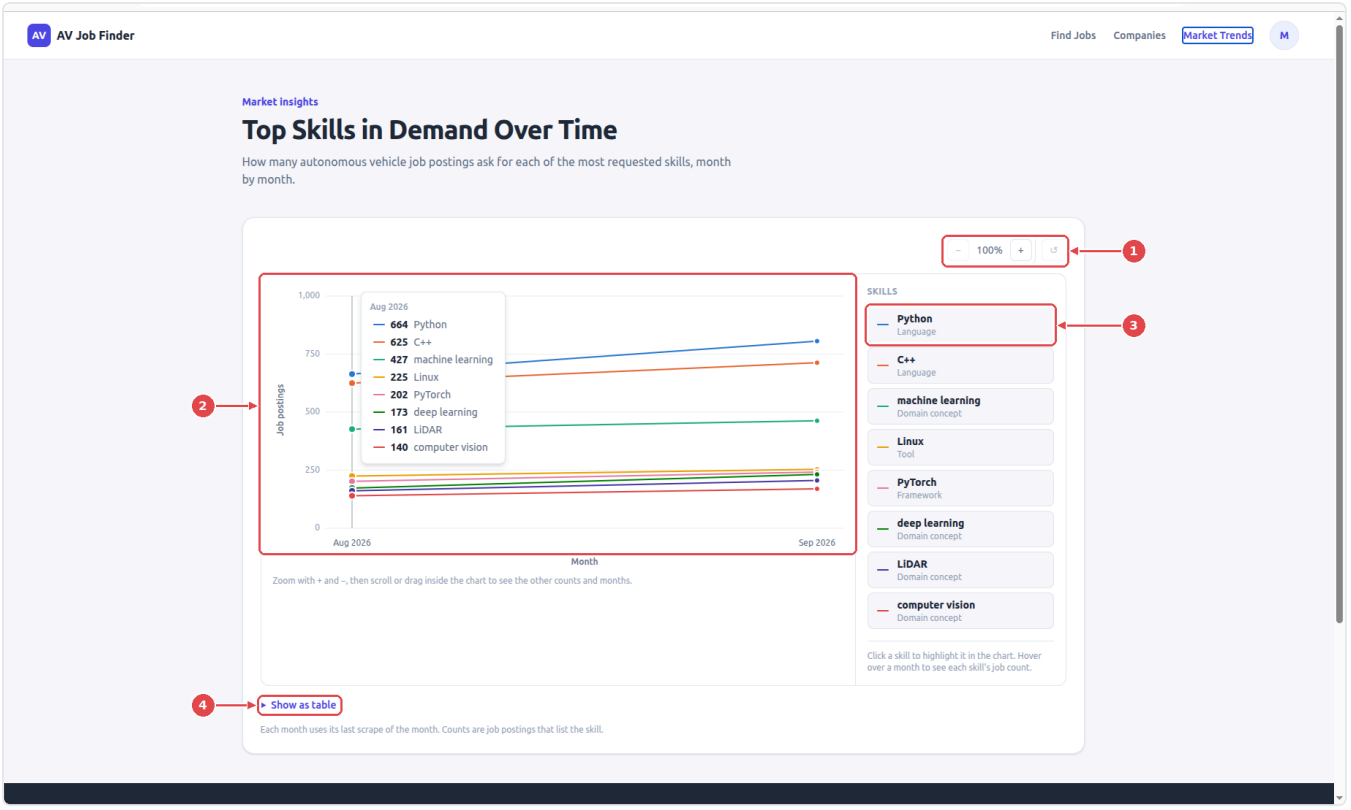

4. Company profile

Open it by clicking a company on the **Companies** page.

1. **Back to companies.** Return to the full company list.
2. **View careers page.** Goes to the company's own careers site.
3. **Description.** What the company does.
4. **Open positions.** How many of this company's jobs are listed here.
5. **Job cards.** Each open position with its location, pay, type and posting date. Click one to open the job.

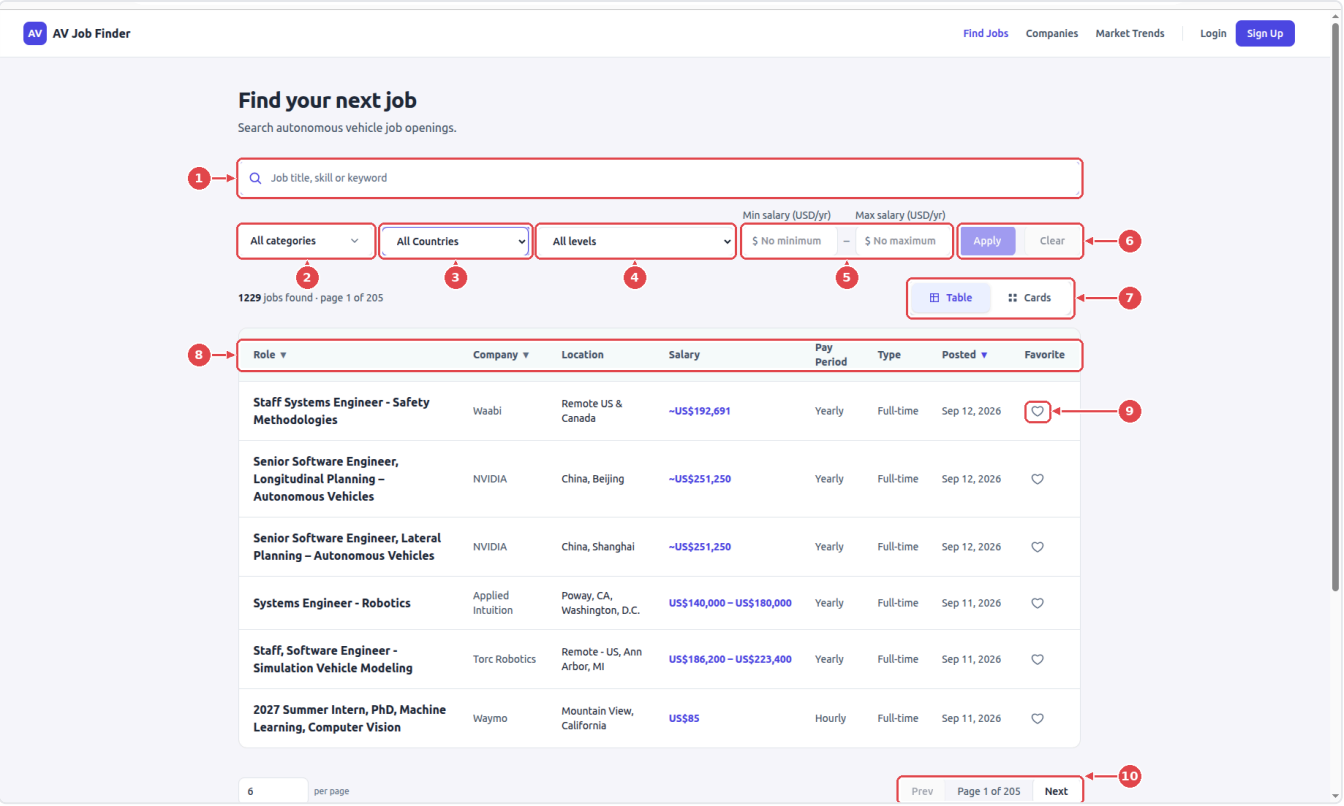

5. Market Trends

1. **Zoom.** Use **+** to enlarge the chart (up to 400%) and **−** to shrink it; once enlarged, scroll or drag inside the chart to see more months. The **↺** button returns to 100%.
2. **Chart.** One line per skill, showing how many job postings list that skill each month. Hover over a month to see every skill's count. With the keyboard, Tab to the chart and use the left and right arrow keys.
3. **Skills list.** Click a skill to highlight its line and fade the others. Each entry also shows the skill's type (language, tool, framework and so on).
4. **Show as table.** Opens the same numbers as a table, which is easier to read exactly and works with screen readers.

Each month uses the last scrape of that month, and the counts are job postings that list the skill.

6. Find Jobs

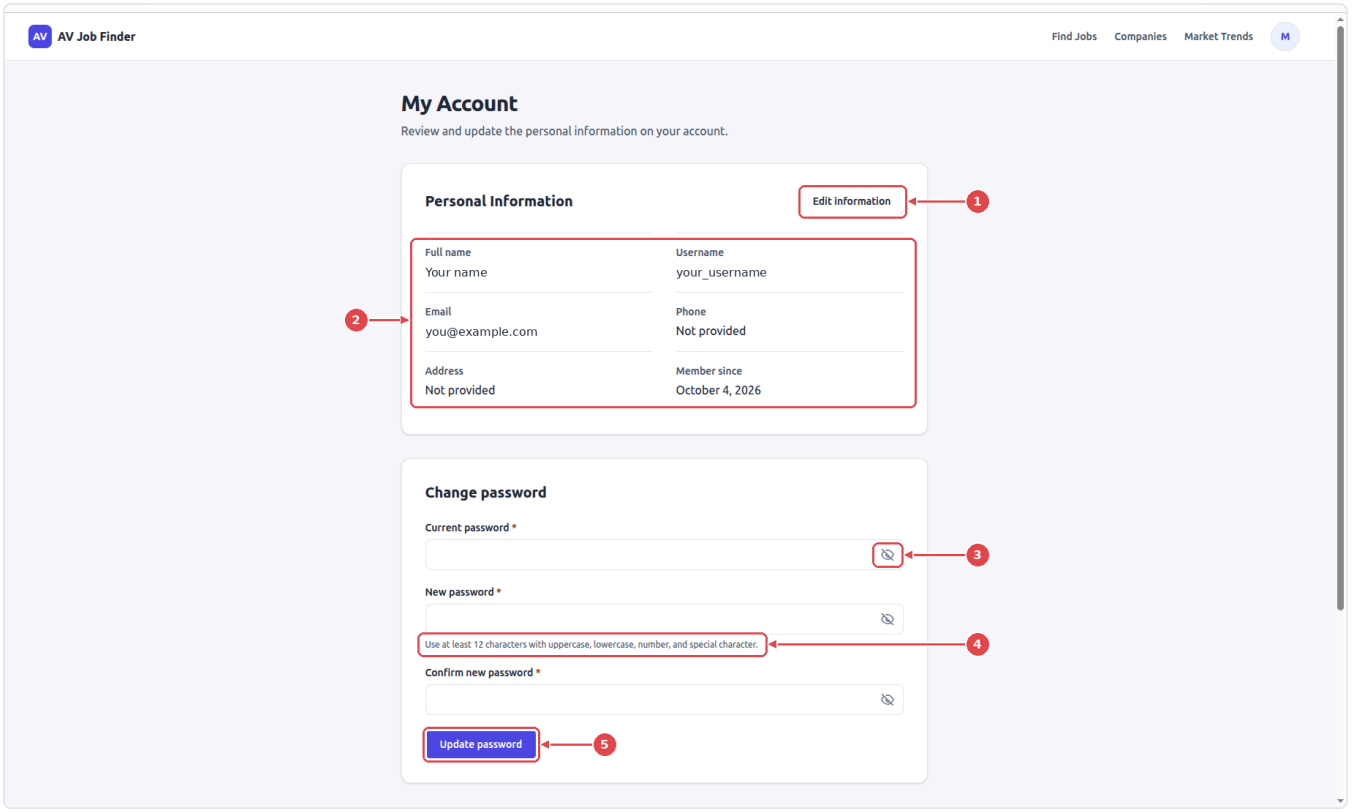

1. **Search bar.** Type a job title, skill or keyword. The results update as you type.
2. **Category.** Show only one job category, such as Perception or Planning.
3. **Country.** Show only jobs located in one country.
4. **Seniority.** Show only one level, from Junior up. The level is read from the job title, so **Mid-level or not stated** also contains jobs whose title says nothing about level.
5. **Salary.** Type a minimum and/or a maximum, in US dollars per year. Each job's pay is converted to a yearly US dollar figure before it is compared.
6. **Apply** and **Clear.** The category, country, seniority and salary choices only take effect when you press **Apply**. **Clear** resets those four. To reset everything including the keyword, use the **Clear filters** link under the result count.
7. **Table** and **Cards.** Switch between a table and a card layout.
8. **Column headings.** Click **Role**, **Company** or **Posted** to sort by it; click again to reverse the order.
9. **Heart.** Saves the job to your favorites. If you are not signed in, you are taken to the login page.
10. **Per page** and **Prev / Next.** Choose how many jobs to show per page and move between pages.

Click a job title to open the full posting, including a **View original posting** link to the employer's ad. The address in your browser updates with your filters, so you can copy it to share a search.

7. My Account

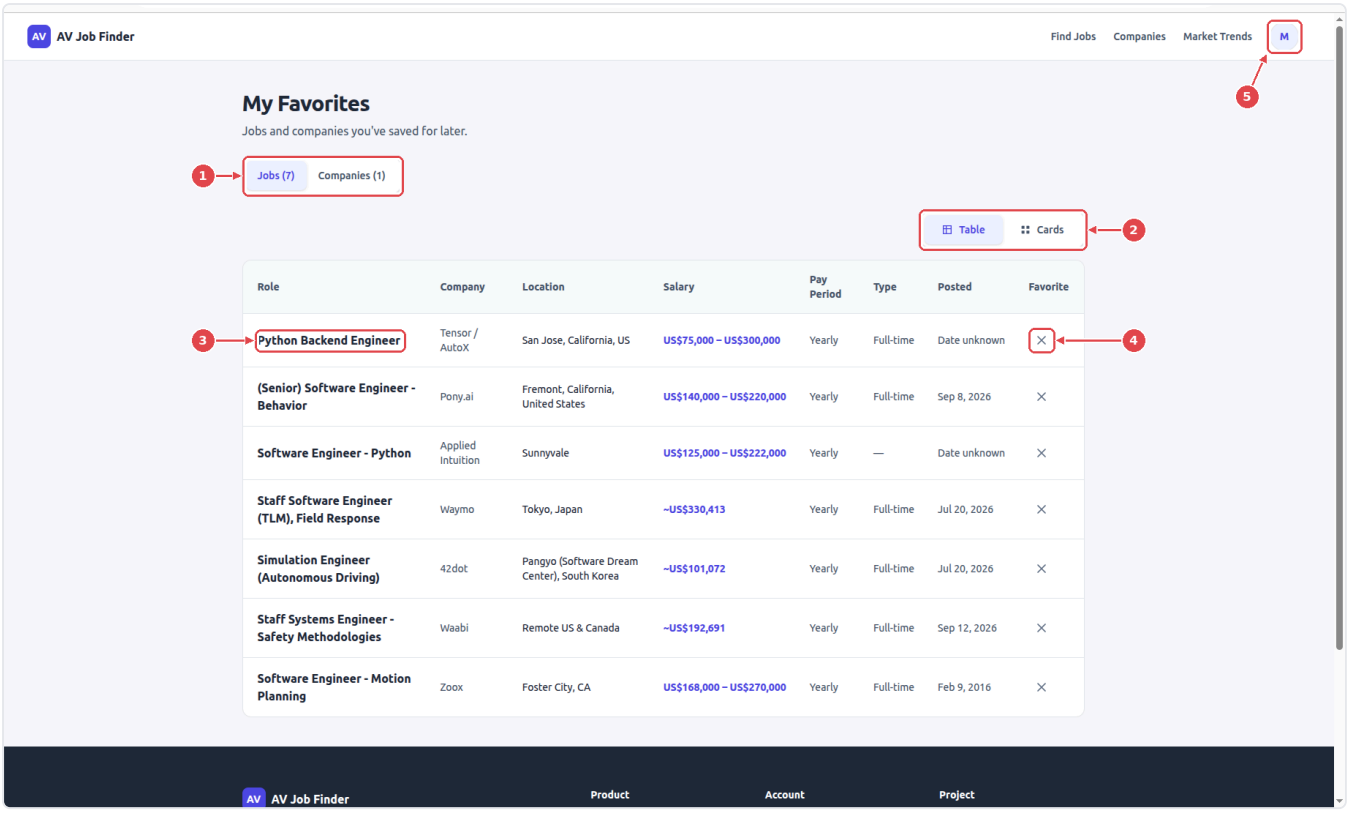

Open it from the profile button, **Change Information**. You need to be signed in. The screenshot shows placeholder values instead of real personal details.

1. **Edit information.** Change your name, username, email, phone or address, then press **Save changes** (or **Cancel**). Changing your email also asks for your current password.
2. **Your details.** The information stored for your account, and the date you joined.
3. **Eye icon.** Shows or hides what you have typed in a password box, so you can check it. Press it again to hide it.
4. **Password rules.** A new password needs at least 12 characters, with an uppercase letter, a lowercase letter, a number and a special character.
5. **Update password.** Enter your current password, the new one, and the new one again, then press this button. You stay signed in. After several wrong current-password attempts you have to wait a few minutes before trying again.

8. My Favorites

Open it from the profile button, **My Favorite List**. You need to be signed in.

1. **Jobs** and **Companies** tabs. Switch between the jobs you saved (with the heart in **Find Jobs**) and the companies you saved on the **Companies** page. The number is how many you have.
2. **Table** and **Cards.** Switch the layout, as in **Find Jobs**.
3. **Job title.** Click it to open the job.
4. **× button.** Removes the job from your favorites.
5. **Profile button.** Open it and choose **My Favorite List** to reach this page from anywhere.
